

Erik Hilaski
“Erik”

Senior Product Manager
GE Power Services

Erik is the Product Manager for Frame 5 and 6B Gas Turbines for Power Services and is located in Atlanta, GA. He is responsible for the strategic roadmap & technology improvement of the installed base - ensuring that the fleet performs at the highest level possible and remains a valuable asset in the customer’s portfolio. Erik has been in the power generation business for over 20 years; 15 years with General Electric holding various commercial and operations leadership roles during this time.

Erik started his career in the power industry with Westinghouse Power in 1995 managing large gas turbine overhaul projects and transitioned to GE’s Contractual Service’s organization in 2000 in Houston, TX. He soon became the Western US operations manager for GE Energy Rentals based in Los Angeles, CA. In 2005, Erik moved to Atlanta to lead the Global Sales team for GE’s non-OEM gas turbine business and later was the Global Sales manager for the Gas Turbine performance optimization business.

In 2010, Erik moved to GE Oil & Gas in Houston as the Commercial Excellence manager to start-up a new-business incubator group focused on developing fast-track, cross-business solutions focused on the growing shale gas industry. Following this, he was asked to lead the commercial integration of GE O&G’s acquisition of Cameron Compression in 2013.

Erik has a Bachelor’s degree in Aerospace Engineering from Florida Institute of Technology and currently resides in Atlanta, GA with his wife Danielle and twin girls – Ava and Leah. Erik is an accomplished homebrewer, a sub-3 hour marathon runner, has completed multiple half-Ironman races and 1 full Ironman.
