

Mike Wenschlag  
Embedded Cogen Support Specialist  
Chevron Global Power

Mike started his career at Chevron in 1989 where he worked in operations at the newly built Cogen plant located at the El Segundo refinery.

In 1995 he started working as a project coordinator on a refinery wide control system upgrade and a third Frame 6B unit added to the refinery.

From 1997 to 2001 Wenschlag was the operations lead outage coordinator for the El Segundo Cogen and from 2002 to 2008 Mike was the operations

trainer at the El Segundo refinery.

After working a short time as a refinery supervisor, he went on to become the El Segundo Cogen Specialist until his addition to the Chevron Power and Energy Management team in June of 2013.

Currently Mike is the embedded support for the El Segundo Cogen plant that consist of 4 Frame 6B units equipped with a dual pressure supplemental fired HRSG's along with the support equipment for the plant.
